

AxTALK-P

Rechargeable Portable Communicator with internal charger

The AxTALK P is a Rechargeable Portable Communication System designed for Commercial Diving Operations. This communicator has an internal rechargeable 12 VDC battery and an internal battery charger. The system has individual volume control for each channels so the supervisor can adjust manually the gain on each channels available among the two divers, the tender, the auxiliary input for music and the external audio output for recording. When used with an AxVIEW Video Recording System, the communications can be recorded with the video on a computer or on a PVR.

Advanced Technology

- PORTABLE enclosure & RUGGED components
- Internal Power Supply with Battery Charger
- Latest technologies in one small enclosure
- Individual Volume Control for earphone and microphone for each channel
- Divers can be set individually to 2-wire or 4-wire mode
- Audio Input (AUX) for smartphone music to divers with Volume Adjustment and Volume Attenuation circuitry
- Audio Output to recorder with Volume Adjustment (+/-)
- Optional Blackbox Audio Recorder on a 64GB TF Card
